Parent Online Payment & Information Portal

Receive Payments Online for Meals, Activities, Transportation, Enrollment . . . Anything!

- Secure Transactions
- Fewer Bad Checks
- Reduce or eliminate cash handling
- Speed up serving lines
- Reduce labor costs
- Interface to SIS for student/course fees

EZSchoolPay.com is an online service by Harris School Solutions. It allows parents to pay for meals and other school-related fees using a credit or debit card (electronic check option is also available).

Parents may also view their student's meal transactions (updated daily) and meal account balance (updated every 10 minutes). Online meal payments are automatically added to Meal Tracker® and eTrition® Point of Service systems within minutes – without human involvement!

Improve your financial picture, while offering a tremendous convenience to parents with EZSchoolPay.com.

EZSchoolPay®.com

Benefits to Both:

Schools	Parents
Flexible! Transaction convenience fee charged to parents is determined by the school or district and can be modified at any time.	Safe! Parent card information is protected with the most sophisticated security available (128-bit digital encryption). Payment processor is PCI Compliant.
Meal credits drop automatically into **Meal Tracker®**, **eTrition®**, **Lunch Express®**, or **CaféConnect®** point of service systems. No need to manually adjust meal account balances at the school site.	Convenient! Parents may add payments any time, day or night, using a Visa, MasterCard, Discover, or electronic check.
Reduced labor hours spent processing cash and check payments.	No more lost checks or envelopes. Payments won't be left in student's book bag for days!
Reduce or eliminate bad checks. And, you'll have fewer meal charges, resulting in an improved financial picture!	Online meal payments are automatically added to the meal point of service system, typically within minutes. This saves time and effort vs. sending a check or cash to the school.
Faster serving lines - students with money on their meal account are served faster than students with negative balances.	Easy! It only takes a couple of minutes to create an account and there is no fee to register.
Collect any school-related payments or fees (enrollment, activities, etc.).	Convenience fee is a flat-dollar amount, which encourages larger online payments.
Fast Funds Advantage - online payments are funded directly to your bank account, usually within 48 hours. Payments funded to you include the parent convenience fee, so you're collecting your costs in advance.	More tools for parents! Now they can view meal transactions online and current meal account balance. They can also set a low-balance email alert to remind them when their student's meal balance is low.
Reports! Transaction data is available for any period in history; exportable to Excel. You can group reports by school and/or payment type.	Connects to **ADM2000®** and **Go.edustar®** Student Information Systems to view and pay student fees and course fees.
